## Code typed inside code environment:

```
struct MyType
  a :: Int64
end
function f(x :: MyType)
  x.a + 1
end
```

And @time f(x) = x + 1 is an example of inline code.

## Including code with codefile:

```
struct MyType
   a :: Int64
end
function f(x :: MyType)
   x.a + 1
end
```

## Including code with codelink:

```
struct MyType
  a :: Int64
end
function f(x :: MyType)
    x.a + 1
end
```
